Hello

Visit my website

I'm a multidisciplinary graphic designer who is especially interested in video design and animation. At its core, I love the visual narrative aspect of graphic design and its absolute power of change and social good. I feel fortunate to have made my childhood dream a profession.

I studied Graphic Design at Bilkent University with a %50 scholarship and finished the department. I believe that being a detail-oriented person and having the analytical thinking abilities that my department has given me will provide me an advantage in many different areas. Various compulsory and elective courses such as Illustration, Marketing, 2d Animation that I took during my studies, and the experiences I gained during my work life, allowed me to develop a different perspective and explore many designing medium.

I had the opportunity to work in different sectors, which allowed me to gain more knowledge and insights into graphic design and better understand what I wanted to work on throughout my career. I gained experience in printing process and products during my internship at Meteksan Print House and Tanyeri Bookhouse. On top of that, I produced social media content for different industry important companies such as MAN Turkey, IGDAŞ, and State Theaters. Using Adobe Premier and Adobe After Effects at Reta.Co Marketing Agency and taking part in the brainstorming and storyboarding phases of the formation of many marketing strategies have broadened my vision.

I worked with many different teams within SFH and designed knowledge products such as G20, UNICEF, and SDG Impact I learned how to make interactive report visualization through power bi, thanks to my versatile production, practical knowledge, and enthusiasm for acquiring new skills that my team needed. I made a website for G20SFWG.org and produced visual content for various social media campaigns. In this process, I tried to be a good part of the team and be a team player as much as possible. I learned a lot from my process at UNDP, not only at the design and professional level but also about happenings in our world. Over the course of my time at the UN community, I was able to overcome and redefine challenges and loved being a part of this valuable UN community.

I've attached my resume for further review. Please do not hesitate to reach out to me if you would like to speak about my experience in more detail.

Thank you for your consideration.

Sincerely,
Onurcan Acar
